DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: The use of the word "rotatably" is grammatically incorrect. The term should be "rotatable". Appropriate correction is required.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claim 6 recites the limitation "optical <u>projection</u> system" in line 2. There is insufficient antecedent basis for this limitation in the claim. The parent claim recites merely an "optical system".

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 5. Claims 1, 3, 5, 7, and 8 are rejected under 35 U.S.C. 102(a) as being anticipated by Dickie (US Pub 2003/0041206). With respect to claim 1, Dickie teaches a cradle for a portable terminal comprising: a desk-top housing (104); a cradle housing (120)

Application/Control Number: 10/812,280 Page 3

Art Unit: 2835

having a recess (see Fig. 3) for cradling the portable terminal (102, [0016] line 1), the cradle housing being mounted in the desk-top housing such that a lower portion (300) of the cradle housing is retractable within ([0023] lines 5-6) and protractible out from ([0022] lines 4-5) the desk-top housing; and an optical system (310, see [0024] lines 5-9) mounted within the cradle housing and emitting a beam in a predetermined direction.

- 6. With respect to claim 3, Dickie teaches wherein the desk-top housing comprises a display unit (110), at least one key disposed adjacent to the display unit (114), and at least one lamp (124) disposed adjacent to the key and the display unit.
- 7. With respect to claim 5, Dickie teaches, wherein the optical system (310) is mounted within a side of the lower rear portion of the cradle housing (see Fig. 3).
- 8. With respect to claim 7, Dickie teaches wherein the cradle housing is rotatably mounted within the desk-top housing (see Fig. 3, the housing can rotate around various axis such as the latch 210 as seen in Fig. 3).
- 9. With respect to claim 8, Dickie teaches wherein only a rear section of the lower portion of the cradle housing is retractable within and protractible out from the desk-top housing (see Fig. 3, the latch side of portion 300 would extend outward when the latch is in an open position).

Claim Rejections - 35 USC § 103

- 10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Application/Control Number: 10/812,280

Art Unit: 2835

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 4

- 11. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dickie (US Pub 2003/0041206) in view of Block et al. (PN 5,113,403). Dickie teaches the device as applied to claim 1 above, but lacks specific teaching of a laser beam projector. Block teaches a laser beam projector (110) for communicating data between electronic devices. It would have been obvious to a person of ordinary skill in the art to use the laser data transmission device of Block with docking cradle of Dickie for the benefit forming a high bandwidth wireless connection with the portable device when docked.
- 12. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dickie (US Pub 2003/0041206) in view of Vossler (PN 6,104,606). For the basis of this rejection, it is taken to be understood that the optical system of claim 1 and the optical projection system of claim 6 are the same feature. Dickie teaches the device as applied to claim 1 above, but lacks an optical projection system that is concealed or exposed. Vossler teaches of an optical projection system that is concealed or exposed depending on the state of a locking mechanism. It would have been obvious to a person of ordinary skill in the art to combine the retractable optical system of Vossler with the cradle of Dickie to obtain an adjustable optical system controlled by the state of the cradle lower portion for the benefit of an optical system that was available for use when the portable terminal is not docked.

Art Unit: 2835

Response to Arguments

13. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new grounds of rejection. With respect to the response to the objection to "rotatably". Where applicant acts as his or her own lexicographer to specifically define a term of a claim, the written description must clearly define the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so define that claim term. The applicant's assertion that "rotatably" is an adverb modifying the verb "mounted" does not clearly define the term. The word "rotatably" could not be found in several reference dictionaries (www.m-w.com, www.dictionary.com, and "The American Heritage College Dictionary" Fourth Edition). Therefore the Examiner maintains the objection.

Conclusion

14. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Application/Control Number: 10/812,280 Page 6

Art Unit: 2835

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Corey M. Broussard whose telephone number is 571 272 2799. The examiner can normally be reached on 7:30-5 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild can be reached on 571 272 2092. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
